

EXCELLENCE IN COMPRESSOR REPAIRS

GREEN POINT CONCEPT

Professional inspections: All compressors are completely stripped down. All parts are analysed.

The Green Point network focuses its activities to fulfill your requirements. Close cooperation with BITZER ensures consistent quality for all the operations carried out in each workshop. Each Green Point workshop combines local market awareness with the global vision of a leading manufacturer like BITZER, minimizing the communication barriers within each region and ensuring achievable consistency in quality and reliability.

We value and gain from every single experience, enhancing our knowledge in order to provide you consistent and better compressor repair and support.

Green Point will make you feel confident of being in the right place where the care of your compressors will be the first priority.

Competence and Quality: BITZER dimensions are checked, gaging of main parts is a must.

The Green Point service network offers you excellence in compressor repairs by means of the following key points:

- **Genuine spare parts:** the high quality of the original parts will guarantee higher performance and reliability for your compressor. Non-original spare parts have no place in our workshops.
- **Professionalism:** our team of highly trained experienced professionals will not only provide you with efficient and quality services, but will also ensure that all your needs and concerns will be addressed.
- **Expertise:** a reliable partner who can solve all your problems. Our group of highly trained technicians is always updated on the latest developments in BITZER products and always enjoys the strong support of BITZER.

GREEN POINT SERVICES

No compromise: Gauging the crankpins ensures the shaft's reusability.

○ **Resources:** always keeping you updated and giving you options and alternatives to suit your business requirements: these are the resources that Green Point is proud to offer. Not only doing the job but offering solutions as well.

○ **Environmental care:** going green has always been a consistent effort and policy at BITZER and this also applies to Green Point. Environmental responsibility, policy and practice are guiding rules for all the workshops.

State of the art reassembly: Performance must be preserved, here checking the dead volume.

PROFESSIONAL INSPECTIONS

Green Point shops are always in close communication with BITZER to share information, experience and updates about technical innovations.

Thanks to this partnership Green Point can provide a careful and professional inspection of compressors returned both within the original warranty period and thereafter. Our competent staff working in the Green Point workshops will provide a valid and comprehensive analysis of the status of your compressor and will advise about the possible root causes of the failure, giving you all the necessary information to make the right decision.

Genuine spare parts out of the box: BITZER's unequalled quality for servicing and repairs.

Careful reassembly of new and reusable parts. Perfect timing for another QC.

GENUINE SPARE PARTS STOCK

The comprehensive stock of genuine spare parts is the additional market guarantee of the better and faster service that the Green Point network can offer.

To maintain quality, reliability and life cycle enhancement, only 100% original BITZER spare parts are used in the workshops for servicing and repairs. The quality and reliability of genuine spare parts is far superior to copies, as they are built according to high quality standards and are designed to perfectly match the dimensional and tolerance criteria used in BITZER compressors.

Only Green Point shops, commit to the systematic use of the Green Point Quality Kit, containing all safety and wear and tear parts.

COMPRESSOR REPAIRS

Once the decision to repair the compressor is taken the Green Point technician will begin the structured process of repair.

Compressor repair consists of servicing and cleaning the key parts of the compressor. Replacement of the parts inside the compressor will not be done at random, but will be carefully evaluated and carried out only if necessary. The other major components still in good condition will be carefully checked, cleaned and repositioned. Furthermore lubricant, gaskets and washers will always be replaced to guarantee safe and reliable operations. Green Point's services are valid for all BITZER compressor types, ranging from small semi-hermetic compressors to the largest semi-hermetic screw compressors.

Running test of the compressor: All main operating parameters are in the scope.

Training operators and field service technicians. Boosting skills is one of our missions.

TESTING CERTIFICATE AND GUARANTEE OF OPERATION

Each Green Point is equipped with a dedicated test bench to check the operational efficiency of the compressors after repairs. Resulting test efficiency is benchmarked against BITZER tolerances as the final quality control.

On request a detailed test report is available to certify the quality of the service carried out by Green Point on your compressor as an additional guarantee of quality.

TRAINING COURSES

All Master Green Point locations are equipped to provide both compressor repair services and unique training courses, detailing comprehensive compressor repairing and support.

Incorporated into the training courses are modules dealing with the diagnosis of system failures and operational trouble-shooting. Such modules raise the Green Point service to a more holistic failure repair and prevention package.

GREEN POINT IS EXPANDING CONTINUOUSLY WORLDWIDE. PLEASE CONTACT YOUR REGIONAL HEAD OFFICE FOR MORE INFORMATION.
